

Sample PHP Code

Retrieves current active call list, prints total number of currently active calls.

Replace **IP.ADDR.OF.SIPX** with the IP address of your primary sipXecs server

```
#!/usr/bin/php
<?php
$client = new SoapClient(NULL, array('cache_wsdl' => WSDL_CACHE_NONE, 'location' => "http://IP.ADDR.OF.SIPX:
8130", 'uri' => "urn:CdrService"));
try {
    $total = count($client->__soapCall("getActiveCalls", array(), array('soapaction' => "getActiveCalls")));
} catch (Exception $e) {
    print "0";
    print "\n";
    exit(1);
}
print $total;
print "\n";
?>
```
